Probe the CIA

CPYRGHT

It is reported that when Congress reconvenes the CIA is to be investigated to see how far it has gone in formulating foreign policy on its own. It is to be hoped that President Lyndon Johnson will give this committee his full support, because he may ascertain facts of which he, himself, is ignorant.

If nothing else, I hope that this investigation will result in the founding of a Foreign Service Academy, as has been discussed for many years, and which appears to be badly needed.
